

M365 Copilot Readiness Assessment

Empowering Your Business with Artificial Intelligence Solutions

**AI can unlock
potential across
your business
however...**

**It could also cause
unintended issues
for the unprepared.**

STARTING THE JOURNEY

Deployment Experience Of Copilot for M365

Copilot for M365 is transforming the way we work and is on the verge of revolutionising the way businesses operate.

Copilot has the potential to save time, unleash creativity, unlock productivity, and elevate skills to unprecedented levels.

However, with this new technology comes new ways of working and introduces new security and governance challenges.

Deployment Experience Of Copilot for M365

Understanding your organisation's readiness to adopt this new technology involves multiple evaluations across your organisation from technical, security, and governance perspectives.

You must also consider how your end-user's will adapt to this new technology.

This comprehensive understanding will form the foundation for a successful Copilot deployment. More importantly, it will drive end-user adoption, ensuring your organisation gets the most out of Copilot for M365.

Maximise your Copilot investment

Unlock the full potential of Copilot for M365 with our comprehensive assessment service.

We'll guide your organisation through the AI transformation journey, ensuring you understand Copilot's capabilities and the technical requirements for secure deployment, including governance, security, compliance, and data management.

Our service covers training and organisational setup to ensure successful user adoption.

After our workshops, you'll receive a tailored report with our findings, recommendations, and a high-level roadmap for deploying Copilot for M365.
